

Percentage Distribution of Smartphone and Tablet Users

This dynamic PDF offers an age-specific overview of the percentage distribution of smartphone and tablet users.

In the first step, users can define various age segments and can enter the respective distribution (without percentage sign) into the input mask. Every age group can be deleted any time using a small button above.

In the next step, the entered data is visualized in a chart at the bottom of the page.

Age group

Smartphone users (%)

Tablet users (%)
